Key to Trail Markings (Blazes)

Blazes in the Guilford Land Trust trails have two attributes: a color and a shape. The color is an arbitrary choice used to differentiate the many trails of the system, particularly in the Westwoods Trails System. The shape has a specific meaning and the different shapes are defined below.

- Main north-south trails are denoted with circles.
- Main east-west trails are denoted with rectangles.
- Special purpose trails are denoted with triangles. In Westwoods there are two Green Triangle trails, which are pedestrian only trails. There are also two trails designated for horseback riding (Red Triangle and Yellow Triangle).
- Square trails are alternate trails that start and end on the same main trail. The color of the square trail will match the color of the main trail for which it is an alternate.
- Cross trails (marked with an “X”) are minor trails that connect two main trails. The color of the “X” indicates the color of the trail it leads to. Typically, the different directions on the cross trails will have different colors.

Turns on trails are denoted in two ways. If a single trail is turning, expect to see two blazes with the top blazes orientation to the lower blaze indicating the direction of the turn. At intersections, with multiple shapes and colors, arrows may be used over single blazes to specify the direction of the turn.

Town Clerks Office on town Green,

Willoughby Wallace Library in Stony Creek.

Property Guidelines

- Open sunrise to sunset.
- Dogs must be leashed. Pick up after your pet.
- Horses on designated trails only.
- No motorized vehicles.
- No unauthorized cutting or collecting.
- No camping. No fires.
- Carry out what you carry in.
- Stay on marked trails.
- Respect private property.

• **Be aware:** **Hunting season** runs from September to March. Hunting is permitted on State-owned land and privately held land adjacent to GLCT property. Wear bright colors and use caution during this time. Check <http://www.ct.gov/deep/hunting> for specific dates and rules.

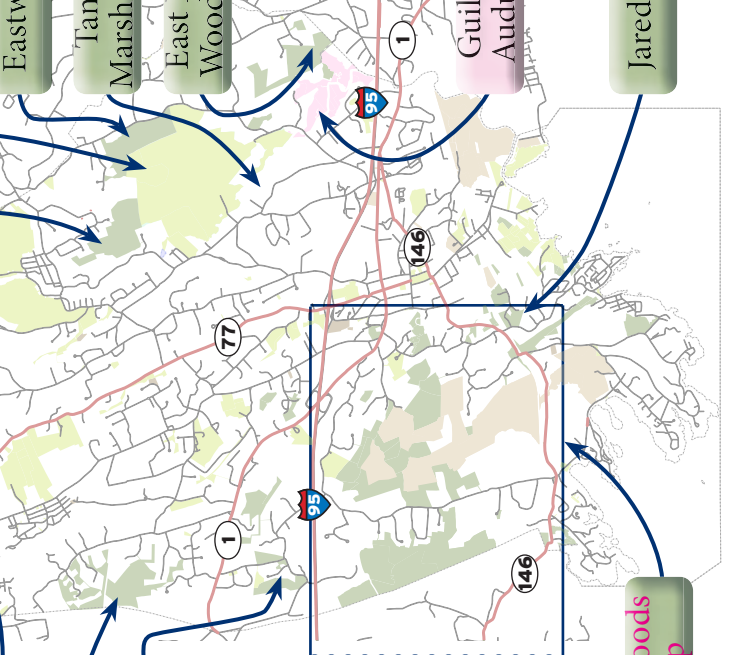

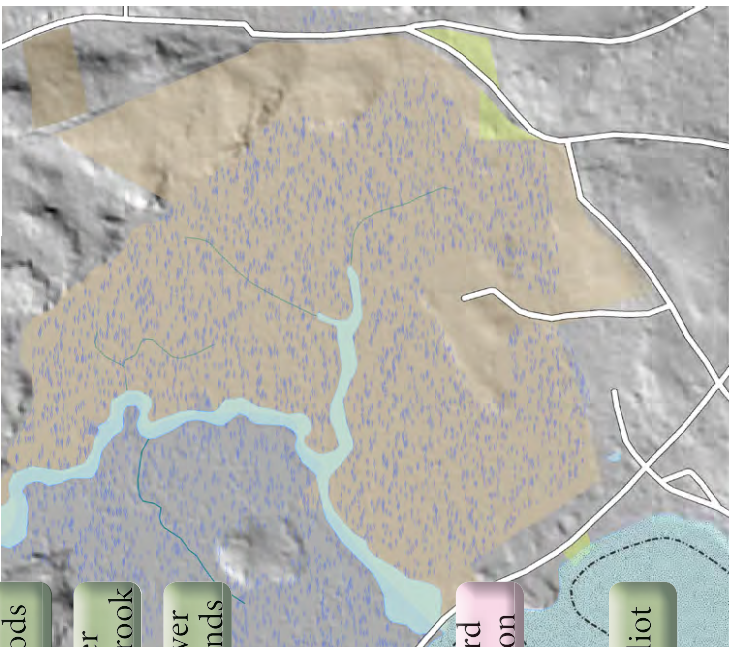

- Use trails at your own risk.

A Few Tips

Trails may run along the base of cliffs. Do not throw anything off a cliff top. When hiking in the winter, remember that snow and ice and cold weather create hazardous conditions. Wear sturdy shoes and appropriate clothing. Plan walks so as not to be overtaken by darkness or storms. A forest can be dangerous during high winds.

ALWAYS CARRY A TRAIL MAP
